Keeping Your Account Secure

Dear Customer,

We take cybersecurity very seriously and privacy is a fundamental commitment at AT&T.

We have discovered that the AT&T account passcode – that you may have used as an extra layer of protection for your DIRECTV or U-verse account - has been compromised. Therefore, AT&T has proactively reset your passcode.

Our internal teams are working with external cybersecurity experts to analyze the situation. It appears the data is from more than 4 years ago and does not contain personal financial information.

What information was involved?

The information varied by customer and account, but may have included full name, email address, mailing address, phone number, social security number, date of birth, AT&T account number and passcode.

What is AT&T doing?

AT&T has setup a dedicated website to provide you with more information and updates at www.att.com/accountsafety.

If your sensitive personal information was compromised, you will receive complimentary identity theft and credit monitoring services.

What can you do?

We encourage customers to remain vigilant by monitoring account activity and credit reports. You can set up free fraud alerts from nationwide credit bureaus — [Equifax](#), [Experian](#), and [TransUnion](#). You can also request and review your free credit report at any time via Freecreditreport.com.

We are committed to keeping your account secure.
